

Northwest Fisheries Enhancement

GROWING TO IMPACT EFFICIENCIES AND EFFECTIVENESS IN HATCHERY OPERATIONS

A Unique New Fisheries Enhancement Group

NWFE is approaching entities such as yours that have responsibilities toward fisheries enhancement and are hatchery owners.

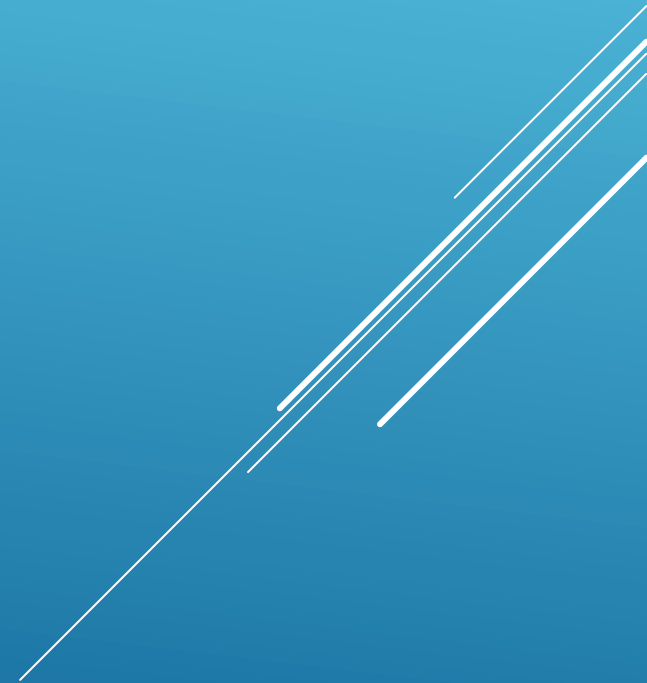

We understand your industry is facing new challenges and now more than ever a need for objective and value management of your fisheries responsibilities.

Industry change, hydroelectric issues, heightened rate payer, customers, and watershed community's concerns, climate change and more are driving change for sustainability and to meet regulatory responsibilities and new strategies are needed.

Competition for mitigated fisheries management has been limited and many times challenging with only a few directions available to you in the past - including having to contract with your regulatory agency.

NWFE is offering new opportunity for your consideration, competitive options towards management of your fisheries responsibilities and hatchery management and wild fish propagation programs with new strategies to assist in meeting the new era challenges.

We're here to ask you, NWPCC Council members as Policy makers that assist in the sustainability of the fisheries to:

Maximize dollars available,

Open a Competitive Process,

Encourage New and Non-Traditional Partnerships,

Set up a process to allow,

To announce NWFE to hatchery owners interested in Building Public/ Private partnerships that offer new Competitive management options with modern best practices

Reach Hatchery owners interested in controlling cost and improving efficiencies and effectiveness in hatchery operations .

Introduce NWFE's other directions; strengthen and build Community Fisheries Organizations and Funding development of.
